

Spindle Bushing Adapter Ring

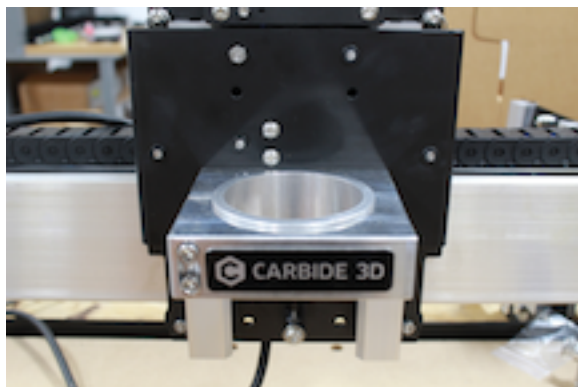

Your new Shapeoko CNC machine includes a spindle mount adapter ring. This ring allows you to use a variety of spindles without the need to custom fabricate your own adapter.

Without Bushing

The stock spindle mount accommodates a spindle with a body diameter of 69mm. It was designed for a DeWalt DWP611 or Porter Cable 450 trim router.

With Bushing

The bushing adapter included with your kit allows you to use any spindle that has a body diameter of 65mm. This includes the popular Makita RT0701C trim router as shown in the photo.
